**1. Presentation of Financial Statements**

Nature of Business

Mimi's Rock Corp., formerly known as Commerce Acquisition Corp. ("the Company"), was incorporated under the Ontario Business Corporations Act ("OBCA") on March 27, 2017. The Company and its subsidiaries operate in Canada and Europe. The head office of the Company is 610 Chartwell Road, Suite 202, Oakville, Ontario. The Company is a marketer and distributor of dietary supplements, vitamins, skin care and other wellness products through online channels to its customers in the United States, Canada and Europe.

The Company was previously classified as a Capital Pool Company ("CPC") as defined in Policy 2.4 of the TSX Venture Exchange. The principal business of the Company as a CPC was to identify and evaluate assets or businesses with a view to potentially acquire them or an interest therein by completing a purchase transaction. The purpose of such an acquisition was to satisfy the related conditions of a qualifying transaction under the Exchange rules ("Qualifying Transaction").

On May 27, 2019, the Company completed its Qualifying Transaction pursuant to an amalgamation agreement between the Company and a private corporation, Mimi's Rock Inc. ("MRI"). As a part of the Qualifying Transaction, the Company changed its name from "Commerce Acquisition Corp." to "Mimi's Rock Corp."

Basis of Preparation

These unaudited condensed consolidated interim financial statements ("interim financial statements") of the Company have been prepared on a historical cost basis, except for certain financial assets which are presented at fair value, in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board ("IASB") ("IFRS") for interim financial statements. The interim financial statements have been prepared on a basis consistent with the Company's annual audited consolidated financial statements for the year ended December 31, 2019. These condensed consolidated interim financial statements are prepared on a going concern basis, which assumes the Company will be able to realize its assets and discharge its liabilities in the normal course of operations as they become due. The interim financial statements are in compliance with International Accounting Standard 34, *Interim Financial Reporting* ("IAS 34"). Accordingly, certain information and note disclosure normally included in annual financial statements prepared in accordance with IFRS, have been omitted or condensed. During the six months ended June 30, 2020, there were no significant changes in accounting policies or their application.

The preparation of the Company's interim financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, at the end of the reporting period. However, uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of the asset or liability affected in future periods. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the financial statements have been set out in Note 2 of the Company's annual audited consolidated financial statements for the year ended December 31, 2019. These interim financial statements should be read in conjunction with the Company's annual audited consolidated financial statements for the year ended December 31, 2019.

These interim financial statements were authorized for issue by the Company's Board of Directors on August 25, 2020.

**15. Financial instruments and financial risk management**

a) Fair Value Estimation

The Company's carrying value of cash, short-term investments, trade and other receivables and accounts payable and accrued liabilities approximate their fair values due to the immediate or short term maturity of these instruments. The fair value of long-term liabilities is not materially different than its carrying value due to the recent issuance of these liabilities.

Carrying value and fair value of financial assets and liabilities are summarized as follows:

Classification	June 30, 2020	
	Carrying value	Fair value
	\$	\$
Loans and receivables		
- Cash	568,372	568,372

- Income taxes payable	311,097	311,097
- Debt	16,915,819	16,958,745

b) Financial Risk Factors

The use of financial instruments can expose the Company to several risks, including market, credit and liquidity risks. Apart from the risks listed below, management is of the opinion that they are not exposed to any other significant risks. A discussion of the Company's use of financial instruments and its risk management is provided below.

(i) Liquidity risk

Liquidity risk is the risk that the Company will not have sufficient cash resources to meet its financial obligations as they come due. The Company's liquidity and operating results may be adversely affected if the Company's access to the capital markets is hindered, whether as a result of a downturn in stock market conditions generally or related to matters specific to the Company. In order to mitigate this risk, the Company maintains a sufficient cash balance in order to satisfy short-term liabilities as they come due and actively pursues raising capital through various public and private financing mechanisms to satisfy longer term needs.

The table below analyzes the Company's non-derivative financial liabilities into relevant maturity groupings based on the remaining period at the statement of financial position date to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows and do not include capitalized transaction costs.

(ii) Market risk:

Market risk is the risk that the fair value of, or future cash flows from, the Company's financial instruments will significantly fluctuate because of changes in market prices. The value of the financial instruments can be affected by changes in interest rates, foreign exchange rates, and equity and commodity prices. The Company is not exposed to significant market risk given the low value of its investments.

(iii) Currency risk:

The following financial assets and liabilities were denominated in foreign currencies at June 30, 2020 (U.S. dollar 1.3614, Euro 1.5298) and December 31, 2019 (U.S. dollar 1.2962, Euro 1.4552, British Pound (GBP) 1.7584):

**For the three and six months ended June 30, 2020 and 2019**

The following table shows the estimated sensitivity of the Company's total comprehensive loss for the three months ended June 30, 2020 from a change in foreign currencies with all other variables held constant as at June 30, 2020:

Percentage change in foreign currencies	Change in net pre-tax loss from % increase in foreign currencies	Change in net pre-tax loss from % decrease in foreign currencies
2%	\$ 10,349	\$ (10,349)
4%	20,698	(20,698)
6%	31,047	(31,047)
8%	41,395	(41,395)
10%	51,744	(51,744)

The Company is subject to currency risk through its sales of products denominated in foreign currencies, purchases of inventory in US dollars and product acquisitions denominated in foreign currencies. As such, changes in the exchange rate affect the operating results of the Company. Dependent on the nature, amount and timing of foreign currency receipts and payments, the Company may from time to time enter into foreign currency derivative contracts to reduce its exposure to foreign currency risks

(iv) Credit risk:

Certain of the Company's financial assets, including cash, short-term investments and accounts receivable are exposed to the risk of financial loss occurring as a result of default of a counterparty on its obligations to the Company. The Company is also exposed, in the normal course of business, to credit risk from customer receivables. These amounts are continually monitored by management for collectability, and, in general, are lower risk as they are typically due from large commercial partners with very limited credit risk.

(v) Interest rate risk:

Interest risk is the impact that changes in interest rates could have on the Company's earnings and liabilities. The Company is exposed to variable interest rates as a result of its senior secured debt, which currently bears interest at the Canadian BA rate plus 3.0%. Given the historical variability in the BA rate, it is management's opinion that the Company is not currently exposed to significant interest rate risk.

COVID-19

Since June 30, 2020, the outbreak of the novel strain of coronavirus, specifically identified as "COVID-19", has resulted in governments worldwide continuing to enact emergency measures to combat the spread of the virus. These measures, which include the implementation of travel bans, self-imposed quarantine periods and social distancing, have caused material disruption to businesses globally resulting in an economic slowdown. At this time, it is unknown the extent of the impact the COVID-19 outbreak may have on the Company as this will depend on future developments that are highly uncertain and that cannot be predicted with confidence. These uncertainties arise from the inability to predict the duration of the outbreak, including the duration of travel restrictions, business closures or disruptions, and quarantine/isolation measures that are currently, or may be put, in place by Canada and other countries to fight the virus.
